

MISSION STATEMENT

The LTW Intralogistics GmbH, as part of the Doppelmayr Group, is a leading company in intralogistics solutions based in Vorarlberg, Austria. Our company is dedicated to the development and provision of first-class intralogistics solutions tailored to the individual requirements of our international customers.

We are aware of our responsibility to future generations and global environmental protection. Therefore, one of our central goals is to make a sustainable contribution to the environment through the integration of innovative technologies and continuous improvement of our operational processes. As a general contractor, we promote the use of renewable energies and focus on energy-optimized solutions in our products. Through continuous improvement measures, we strive to minimize our ecological footprint and reduce the environmental impact of our activities.

Quality is our top priority. We commit ourselves to meet the highest quality standards in every phase of our work. From conception and planning to the implementation and ongoing operation of our intralogistics systems, we ensure that each project is characterized by the highest quality and reliability. Our commitment to quality extends not only to our products and services but also to our relationships with customers, suppliers, and employees.

Social responsibility is an integral part of our corporate culture. We actively contribute to the community in which we operate and aim to create a positive working environment where our employees can fully realize their potential. We support local initiatives and contribute to promoting social responsibility in our region and beyond.

Our commitment to the environment and society is reflected in our mission to increase the efficiency of land use through space-saving high bay storage systems. Our products empower customers to actively counteract land sealing, thereby actively contributing to the conservation of natural resources.

At LTW, we take pride in supporting our customers with their complex logistical challenges. Our passion for innovation, sustainability, and excellent customer service drives us to continuously find new ways to fulfill our commitments to the environment and global society.

Together with our customers, partners, and employees, we are working to shape a better and sustainable future by providing outstanding intralogistics solutions that promote economic success in an ecological manner.
